

# Bring tax advisory to the next level with us

## DevOps/Cloud Engineer (M/F/X) wanted!

### Who we are

Taxy.io is an award-winning tech startup that brings tax advice to the next level with artificially intelligent software. The RWTH Aachen spin-off was started by computer scientists, business engineers and tax advisors in 2018. **We are looking for DevOps/Cloud Engineers to join us and grow with us together.**

### What we look for

The team of Taxy.io is looking for **DevOps/Cloud Engineers (m/f/x)** who will help us to build our vision to become the central, highest-quality technology platform for digital, legal intelligence, which covers the information needs of market participants in tax and legal advice in real time.

### Your profile

- 3+ years experience of having worked in a DevOps and/or Cloud Engineering role (system administration, development, infrastructure and scripting)
- Excellent degree in Computer Science, or a related field, or equivalent alternative education
- You have very good **scripting** skills, in particular in Bash and Python
- Proven track record regarding your experience with **container solutions** (Docker, Kubernetes), as well as **cloud computing** (AWS, Azure, or similar)
- Good understanding of **automation frameworks** (Ansible, Chef, Puppet)
- Development of continuous integration and deployment of pipelines are no unknown concepts for you
- You have a good general understanding of IT security and data protection concepts
- As we are an international team we expect you to have a very good knowledge of English and good knowledge of German

### What are your tasks

- Ensuring (24/7) **high availability** and **scalability** of our Taxy.io platform
- You will support us in several important fields from requirements management to ongoing operation and further development of all subsequent systems

- **Build automation** for **deployment** and further development of all **CI/CD processes** and environments
- Stable operation of IT services including **testing, monitoring, error analysis, fault clearance** and logging as well as subsequent **technical documentation**
- **Application management** for the transfer of new features to make them ready for the market
- **Maintenance** of the development environments and support of the development processes

## What you can expect

- Opportunity to implement the latest developments from NLP research into practice
- Dealing with **responsibility** from day one and working as a member of a great agile team consisting of **tech experts, data scientists** and **experienced startup managers**.
- We provide you with the possibility to **grow professionally** and **personally**
- **Flexible** work schedule and places
- A beautiful office located in Cologne's Mediapark
- A competitive salary
- Having **fun** with a great young team disrupting the tax and legal technology industry

## Contact

Please submit your CV, desired starting date and salary expectation to our CIO, **Mr. Sven Weber**, via [hr@taxy.io](mailto:hr@taxy.io) and include "DevOps/Cloud Engineer" in the subject line.
