

Internship Product Management

The role

At envelio, we are proud to have been named as one of the **hundred most innovative clean technology companies** in the world. And we want to achieve even more with our shared vision of driving forward the energy transition using digital technologies. Our **web application platforms** already enable grid operators to digitize and automate their core processes.

In our dynamic team, you will have the opportunity to actively contribute new ideas. In your role, you will act between the different teams and departments, participate in the entire product development process and contribute with your electrical engineering expertise. As a team, you pursue the goal of understanding the requirements of all stakeholders and developing an innovative product that sets new standards and accelerates the energy transition.

Your tasks and responsibilities

- You will help the team to filter new ideas and customer feedback as well as to create use cases. Together with the design team, you will develop new software features based on these impulses
- You support the team in writing release notes for the latest software updates and the testing of new functionalities
- You will be responsible for developing the content of the technical documentation for the Intelligent Grid Platform, working closely with different teams
- You will be responsible for Product Discovery regarding new markets, regulations and typical processes and use cases
- In order to develop a comprehensive understanding of our Intelligent Grid Platform and the internal processes, you will also work closely with the other departments (especially Engineering or Customer Success)

What you need to succeed

- You have almost completed your bachelor's degree or are currently completing your master's degree in electrical engineering, power engineering, computer science, industrial engineering, business informatics or a comparable course of study.
- You know the basics of a programming language (e.g. Python).
- Communication is one of your strengths - you contribute to a winning and appreciative exchange.
- Furthermore, you have a very good command of German and English, both written and spoken.
- You are able to quickly understand complex contexts and present them in a comprehensible way.
- You can convince with your independent way of working: You like to work on your self-driven, take responsibility for your topics and structure your tasks in a target-oriented way.
- Energy supply and power grid calculation are not unfamiliar fields for you - you have already been able to gain initial knowledge in these areas.
- You are enthusiastic about the energy transition and our product and are interested in driving the further development of our Intelligent Grid Platform.

Why envelio

- Flexible working mode within Germany: Hybrid, from home or in our lovely office in Cologne
- Option for remote work from abroad (up to three months per year)
- 20 holidays + 3 corporate holidays
- Support for your health through sports membership cooperations

- Flexible use of a monthly mobility budget (e.g. Jobrad, ÖPNV)
- Time and resources for individual growth
- Regular company and team events
